

Drum Dryer (SMT-DD-115)

Spray drying Drum drying equipment is made of highest quality stainless steel, great for stirring and drying products.

The rotating speed of the drum is adjustable thanks to the use of a frequency converter.

Eliminating moisture with the use of a drum is an approach applied for drying out moisture from the product.

TECHNICAL SPECIFICATIONS

Technical Data:

- Drum size: (D x L): 300 mm x 300 mm, Drum made of SS 304 06mm
- sheet thickness. Drying capacity: 5-10 kg/hr depends on product,
- Water evaporation: Up to 3-5 liter/hr.
Steam consumption: 20
- kg/hr. Max operating temp.: 110-150°C
- Pressure: 4 bar max

Features:

- All made of SS.
- Product contact parts made of SS 304.
- Variable speed adjustment.
- Digital RPM Display.
- SS Scraper with adjustable pressure for product recovery.
- Easy to operate.
- Complete unit with all accessories and installation.
